

### Manual Settings for All Devices

Account type	<b>IMAP</b>
Mail servers (incoming/IMAP & outgoing/SMTP)	<b>saturn.filebunker.co.uk</b>
IMAP port	<b>993 with SSL</b>
SMTP port	<b>26/465/587 with TLS if available or SSL (Port 587 is preferred )</b>
SMTP server requires authentication	Select 'same as incoming server' if offered If not, just re-enter the credentials
Username	Your full email address
Password	As advised
Mailbox prefix (optional but advised)	<b>INBOX</b>

The server will accept unencrypted connections for SMTP and IMAP however this is NOT recommended. SMTP is also available on port 25 however ports 26 and 465 are preferable.

### Mac Mail Additional Steps

After the account has been successfully installed and once in the main window of Mac Mail find the account name in the left pane.

In the folders listed beneath the account name, click on each of the following folders in turn, then select the Mailbox menu. In each case, select 'Use mailbox for...' and then select the corresponding function:

<b>Folder</b>	<b>Function</b>
Sent	Sent Mailbox
Trash	Trash Mailbox
Spam	Junk Mailbox
